## §416.42

## §416.42 Condition for coverage—Surgical services.

Surgical procedures must be performed in a safe manner by qualified physicians who have been granted clinical privileges by the governing body of the ASC in accordance with approved policies and procedures of the ASC.

- (a) Standard: Anesthetic risk and evaluation. (1) A physician must examine the patient immediately before surgery to evaluate the risk of anesthesia and of the procedure to be performed.
- (2) Before discharge from the ASC, each patient must be evaluated by a physician or by an anesthetist as defined at §410.69(b) of this chapter, in accordance with applicable State health and safety laws, standards of practice, and ASC policy, for proper anesthesia recovery.
- (b) Standard: Administration of anesthesia. Anesthetics must be administered by only—
  - (1) A qualified anesthesiologist; or
- (2) A physician qualified to administer anesthesia, a certified registered nurse anesthetist (CRNA) or an anesthesiologist's assistant as defined in §410.69(b) of this chapter, or a supervised trainee in an approved educational program. In those cases in which a non-physician administers the anesthesia, unless exempted in accordance with paragraph (d) of this section, the anesthetist must be under the supervision of the operating physician, and in the case of an anesthesiologist's assistant, under the supervision of an anesthesiologist.
- (c) Standard: State exemption. (1) An ASC may be exempted from the requirement for physician supervision of CRNAs as described in paragraph (b)(2) of this section, if the State in which the ASC is located submits a letter to CMS signed by the Governor, following consultation with the State's Boards of Medicine and Nursing, requesting exemption from physician supervision of CRNAs. The letter from the Governor must attest that he or she has consulted with State Boards of Medicine and Nursing about issues related to access to and the quality of anesthesia services in the State and has concluded that it is in the best interests of the State's citizens to opt-out of the current physician supervision require-

ment, and that the opt-out is consistent with State law.

(2) The request for exemption and recognition of State laws, and the withdrawal of the request may be submitted at any time, and are effective upon submission.

[57 FR 33899, July 31, 1992, as amended at 66 FR 56768, Nov. 13, 2001; 73 FR 68812, Nov. 18, 2008]

## § 416.43 Conditions for coverage— Quality assessment and performance improvement.

The ASC must develop, implement and maintain an ongoing, data-driven quality assessment and performance improvement (QAPI) program.

- (a) Standard: Program scope. (1) The program must include, but not be limited to, an ongoing program that demonstrates measurable improvement in patient health outcomes, and improves patient safety by using quality indicators or performance measures associated with improved health outcomes and by the identification and reduction of medical errors.
- (2) The ASC must measure, analyze, and track quality indicators, adverse patient events, infection control and other aspects of performance that includes care and services furnished in the ASC.
- (b) Standard: Program data. (1) The program must incorporate quality indicator data, including patient care and other relevant data regarding services furnished in the ASC.
- (2) The ASC must use the data collected to—
- (i) Monitor the effectiveness and safety of its services, and quality of its care.
- (ii) Identify opportunities that could lead to improvements and changes in its patient care.
- (c) Standard: Program activities. (1) The ASC must set priorities for its performance improvement activities that—
- (i) Focus on high risk, high volume, and problem-prone areas.
- (ii) Consider incidence, prevalence, and severity of problems in those areas.
- (iii) Affect health outcomes, patient safety, and quality of care.
